# Welcome to Nivault

## About Us

Nivault is one of the Leading Professional Electromagnetic Lock manufacturers in India, servicing the industry over a decade.

Our varied product portfolio is perfected to comply with the international standards and security requirements with stable performance, competitive price and personalized service.

Nivault has a strong technical, marketing and R&D team to ensure the product fits into the need of client. The R&D team aims to develop, research, design and produce more innovative products that suit the market demand in the industry.

Nivault will always be devoted to offer good quality and new technology products to create more value to the customers.

## About Our Product

Electro-magnetic locks are generally connected to access control system which demands higher one time investment and fewer features.

Nivault BLE Electromagnetic Lock is extremely cost effective using state of the art of IOT technology for small and home offices and also feature-rich to cater needs of medium and large scale organizations.

Nivault provides extremely user friendly mobile application for both organization and employee to access office doors.
